Skills

- Executive Team Leadership
- Project Management – Agile, Waterfall, Hybrid
- Agile Scrum Master
- Cloud Infra Architect – Oracle & AWS
- Oracle ERP Applications and Databases architect – Oracle E-Business suite admin, Fusion Middleware admin and Database admin
- Oracle Business Intelligence and Data Warehouse admin
- DevOps automation, SQL, PLSQL, Shell Scripting, Python
- Project Management Tools used include – Jira, Github, Confluence, Rational tools(IBM), ALM, Service Now, MS Office (MS Projects, MS PowerPoint, MS Word, MS Excel etc.)

Certifications

- Project Management Professional – PMI
- Agile Certified Practitioner – PMI
- Certified Scrum Master – Scrum Alliance
- Generative AI Overview for Project Managers – PMI
- Oracle Cloud Infrastructure Architecture Associate (OCI)
- Oracle Cloud Infrastructure Artificial Intelligence Certified Foundations Associate
- Technology Architect – Accenture
- AWS Cloud Practitioner
- Introduction to Generative AI - Coursera
- Introduction to Responsible AI- Coursera
- Introduction to Large Language Models- Coursera

Professional Experience

HuMetis/Candid Global Technologies – Senior Manager Information Technology

Oct 2021 – Till Date

- Participated in Business growth initiatives through effective client engagement and partnerships
- Engaged in preparation and execution of Request for Proposals to secure new business opportunities and partnerships
- Led comprehensive training initiatives to empower internal teams with cloud technology skills and knowledge, enhancing performance and fostering professional growth

Accenture – Technology Architectures Manager

Feb 2011 - Oct 2021

Major Projects – Kaiser Permanente, CalHEERS(California USA), MyEHR(Australia Healthcare), MOHH(Singapore Healthcare), EHR Assets(Accenture asset)

- Led cutover and migration project(Agile) at Kaiser Permanente, overseeing transition of legacy system data to Oracle ORMB in cloud environments. Managed CA billing data migration, collaborating with stakeholders for seamless transition. Demonstrated strong leadership, ensuring timely and budget-conscious execution, achieving desired outcomes.
- As Tech Architectures Manager for CALHEERS(California Health Eligibility Enrollment System) project, led and managed geographically diverse teams across Development, Environment, and Database architecture, Automation development, and DevOps deployments, managing release coordination for 200+ production releases. Key achievement: Implemented onshore-offshore delivery model, transitioning from Waterfall to Agile, and migrating Applications and Databases from Datacenter to AWS Cloud using lift and shift approach.
- Effectively led a team of architects in the MyEHR(Australia Health) project, predominantly consisting of freshers (80%), ensuring their up-skilling and optimal utilization to achieve timely releases(50+) and high-quality deliverables across Infrastructure, Integration, Automation, and Security domains. Leveraged asset(Electronic Health Record) accelerators

to streamline project architectures, leading to substantial cost savings and early project delivery, resulting in significant profit margins.

- As Senior Architect, developed Electronic Health Record asset, integrating 19+ Oracle products (E-Business Suite, Fusion Middleware/SOA, Security stack, BI, Oracle OLTP, and DW databases), utilized across multiple projects as an accelerator having cost-saving(savings in millions) measure for initial development and test deployments.

Oracle - Senior Consultant

Jan 2006 - Feb 2011

Major Projects – Kellogs, Honda motors, Toyota, Videocon, Vodafone, Bajaj electricals, Secure meters, Amul DudhSagar dairy, Agrotech foods, Finland Nordic projects like Nokian tires

- As a Lead Oracle Apps DBA, provided comprehensive support to over 30 projects involving ERP implementation and upgrades. Delivered solutions encompassing High Available and Scalable solutions, Sustainable Network topologies, Backup strategies, Risk identification and mitigation, ERP System Audits, and Performance tuning recommendations.
- Pioneered the implementation of Oracle Business Intelligence solution on the Linux platform for Bajaj Electricals.
- Trailblazed the stress testing of Exadata databases on HP servers within HP labs utilizing Load Runner, pioneering new methodologies.
- Effectively managed, coached, and mentored junior DBAs within vendor teams, leveraging their skills to enhance project success.
- Received multiple commendations from client leads across various projects for delivering solutions promptly and with high quality, facilitating smoother business operations post-implementation and upgrades.

Shoppers' Stop - Staff Consultant, Oracle Apps DBA

Apr 2004 - Jan 2006

- Implemented electronic funds transfer solution for Oracle Financials effectively linking retail vendors with commercial banks.
- Pioneer in migrating Oracle 11.5.7 to 11.5.9 from Windows NT to Linux system

Excel Industries - Senior Officer, Information Technology

Sept 1999 - Apr 2004

- Created a streamlined solution for migrating data from Foxpro 2.0 to Oracle 8i, seamlessly transferring data from 27 C&F agents distributed nationwide into a centralized system in multiple phases.

Educational Qualification

- Bachelor of Science(Physics) – University of Mumbai
- Diploma in Software Engineering – Aptech Computers

Awards and Recognition -

- 5-time ACE (Accenture Celebrates Excellence) award winner.
- Best project award for Nokian Tires, Finland project in Oracle Corp.
- Recognition for demonstrating behaviors that exemplify our shared values and serve as an example for others –Kaiser
